

GEMINI 1000

...A NEW CHAPTER IN RADIOGRAPHIC DIGITAL IMAGING

“HANDS DOWN”
THE BEST CHOICE IN PORTABLE DR

The GEMINI Family of Radiographic Imaging Upgrade Systems

GEMINI 1000

Pediatric & Neonatal Radiography
Orthopedic Radiography
Trauma
ICU
Bedside Care

LATEST FLAT PANEL TECHNOLOGY

- 129 Micron Pixel Size
- 2048 x 1536 Matrix
- High Contrast
- 14 bit image 16,384 gray shades
- Direct Conversion
- Full Field preview in 5-7 seconds
- Full DICOM support
- Simple Operation and Installation

SECONDARY IMAGE PROCESSING

PACE *Pyramid Analysis Contrast Enhancement*

While the size of the detector is important, pediatric presents a different data set than adult radiography

Pediatric Radiography requires that the Technology & Image Processing be optimized for this very special task.

Secondary Processing is ESSENTIAL for pediatric imaging but is OPTIONAL or Non-Existent with our competitors

Drawing on its extensive technology, experience, and resources, DEL is expanding the availability of digital informatics for all levels of medicine through targeted engineering.

DEL offers a growing family of high-performance, Maximum Value Digital Imaging Solutions to meet the clinical challenges of today and tomorrow.
